Issues fixed:

- Backup Policy is in place and being used.
  - A backup was saved on to OneDrive and my hardware.
- Standard Unit Testing used
  - All parts of the code were tested and functional
- Physical Security of actual computer code is stored on is adequate
  - Mulitipe backups are in place incase Github goes offline. The laptop I am using has a password as well.

Things that need to be worked on

- Security Testing used (the type varies)
  - Priority: high
  - Implement a form of security testing
- Third-Party libraries used in code are up-to-date and have been checked to ensure no security issues exist.
  - Priority: high
  - Check if code form third party libraries are up to date
- Accounting: Logging is integrated into the code itself (for exceptions, errors, and user input failures at minimum)
  - Priority: high
  - Integrate logging into code
